

Student Profile & Treatment Outcomes

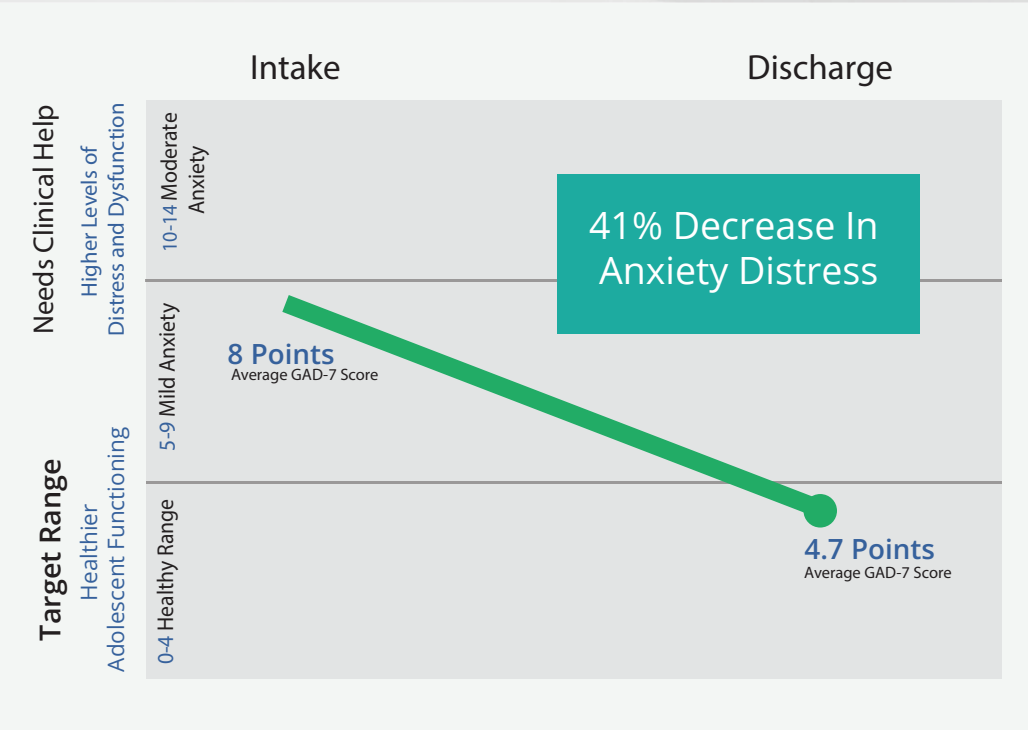

At OASIS Ascent, we are dedicated to delivering compassionate and comprehensive care to teenagers and their families as they navigate challenges such as anxiety, depression, ADHD, trauma, suicidal thoughts, and difficult behaviors.

As a short-term (60-90 day) residential treatment center, we offer comprehensive mental health services, including Observation and Assessment, Stabilization, and Intensive Therapeutic Support. Our holistic approach ensures that our assessments and personalized interventions are carefully designed to help teens heal and thrive, empowering them towards a brighter future.

Overview Of Oasis Ascent

Outcomes and Key Findings

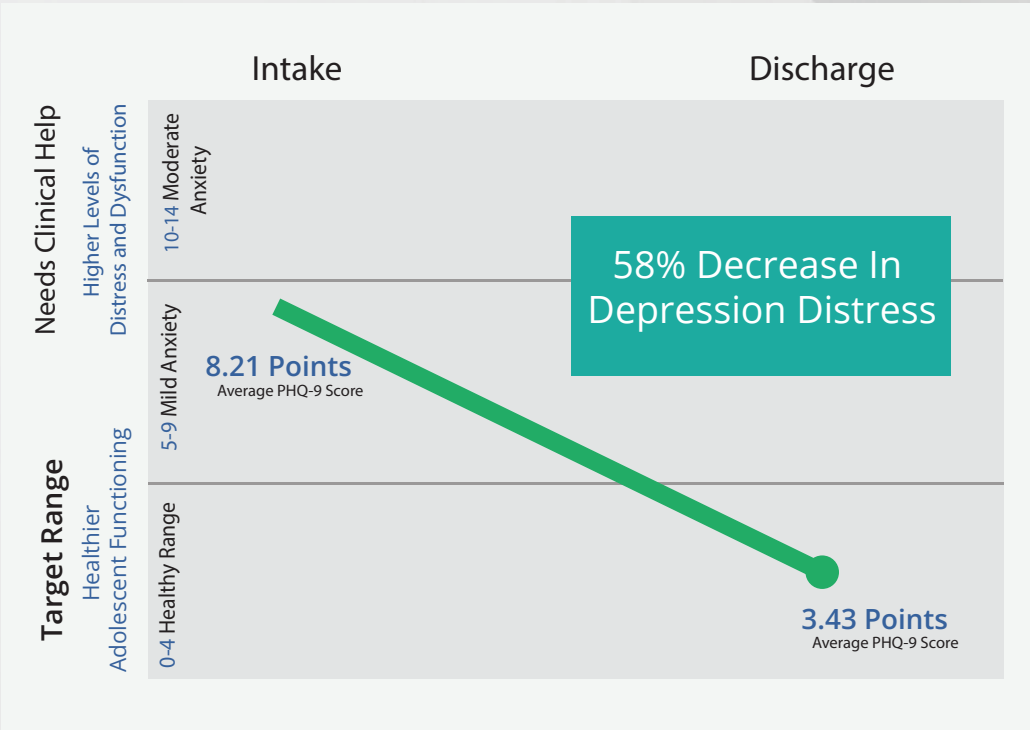

Anxiety Distress

Student's Average GAD-7 Score Demonstrates a **41% Improvement** From Admission to Discharge

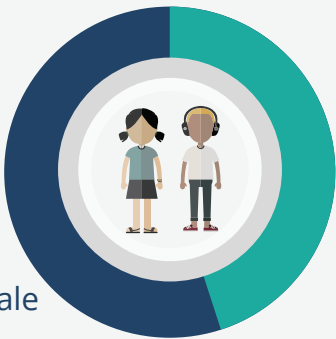

Depression Distress

Student's Average PHQ-9 Score Demonstrates a **58% Improvement** From Admission to Discharge

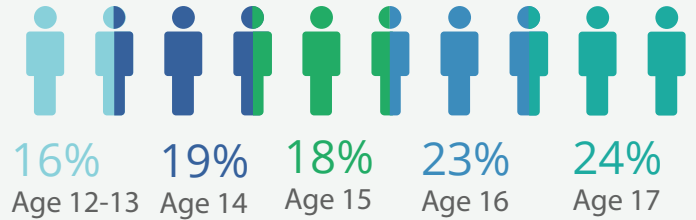

The research methodology includes the administration of an automated survey to all Students at predetermined intervals during treatment for data gathering purposes.
